

Rose Shane Fernandez

PYTHON DJANGO DEVELOPER

Profile

I am a professional and results-oriented software engineer with 8+ years of development experience in hardware embedded, application, and web systems using various technologies.

With good analytic skills, diagnosing, debugging, and developing solutions.

Passionate about learning new technologies with a focus on backend development.

Resourceful and a team player who thinks outside the box with the capacity to grow, learn, and adapt while contributing significantly to the team.

Employment History

Python Django Developer, Cloud Employee, Makati City, Metro Manila, Philippines

JANUARY 2023 – AUGUST 2023

- Developed a web application that works as AI to pinpoint specific workplace behaviors using Python Django as the main programming language
- Reviewed, designed and implemented APIs based on user's requirements and specifications
- Coordinated with front end developers to ensure smooth feature delivery
- Designed, developed and maintained database models
- Optimized performance of API endpoints
- Ensured code quality by writing unit tests
- Experience in continuous delivery pipeline via AWS

Python Django Developer, Willis Towers Watson, Taguig City, Metro Manila, Philippines

JULY 2020 – DECEMBER 2022

- Developed and maintained a web application used by business analysts to input and extract client data with Python Django as the main programming language
- Worked with a global team to achieve a solution to feature and produce tickets
- Assigned as the main developer on high complexity features
- Triaged production tickets
- Mentored junior developers
- Ensured code quality by performing code-review
- Reviewed and coordinated release items with the DevOps team before deployment to production

Python Calculation Developer, Willis Towers Watson Philippines, Taguig City, Metro Manila, Philippines

MARCH 2018 – JUNE 2020

- Developed and maintained an application which calculates the client's pension and benefits with Python as the main programming language
- Provided technical and triaging support for defects
- Worked with a global team to achieve a solution to feature builds and bugs
- Monitored and managed tickets of the local scrum teams to avoid collisions during deployment
- Ensured code quality by writing unit tests
- Contributed to QA-related tasks such as test data preparation, end-to-end testing and test documentation
