

Rose Shane Fernandez

Profile

Python Django Developer with 8+ years of professional software engineering experience in backend development, SaaS applications, RESTful APIs, enterprise systems, embedded systems, and cloud-based platforms.

Experienced in designing, developing, and maintaining scalable Django applications, database-driven systems, and production-ready APIs.

Strong experience collaborating with cross-functional and global teams to deliver reliable, high-quality software solutions. Enthusiastic about AI-assisted software development and leveraging modern AI tools to improve productivity, code quality, and solution delivery.

Employment History

Python Django Developer, Cloud Employee, Makati City, Metro Manila, Philippines

JANUARY 2023 – AUGUST 2023

- Maintained an AI-assisted B2B SaaS platform using Python Django to analyze workplace behavioral patterns and deliver real-time leadership coaching insights.
- Designed, developed, and maintained RESTful API endpoints using Django REST Framework (DRF), aligned with user requirements and technical specifications.
- Collaborated with front-end developers to ensure seamless feature integration and consistent UI/backend contracts.
- Optimized response times for high-traffic endpoints.
- Engineered and optimized relational database models; improved query performance through indexing and query optimization.
- Maintained code quality through unit testing and peer code reviews.
- Experienced in continuous delivery pipelines via AWS and GitHub Actions.

Python Django Developer, Willis Towers Watson, Taguig City, Metro Manila, Philippines

JULY 2020 – DECEMBER 2022

- Led the successful delivery of a previously stalled internal enterprise platform to production, supporting client data management, contribution workflows, and fund administration processes.
- Served as lead developer on high-complexity features, coordinating with global cross-functional teams to deliver business-critical solutions.
- Triaged and resolved production incidents, minimizing system downtime and improving reliability.
- Mentored junior developers on Django best practices, code standards, and Agile workflows.
- Enforced code quality standards through code reviews.
- Coordinated release management with the DevOps team, ensuring zero-defect deployments to production.

Python Calculation Developer, Willis Towers Watson Philippines, Taguig City, Metro Manila, Philippines

MARCH 2018 – JUNE 2020

- Developed and maintained a Python-based calculation engine for client pension and benefits computation.
- Collaborated with global development teams on feature development, defect resolution, technical support and bug triaging.
- Monitored and coordinated local Scrum team tickets to prevent deployment conflicts.
- Contributed to QA workflows including test data preparation, end-to-end testing, and test documentation.
- Onboarded and guided new hires on tools, workflows, and system architecture.

Enterprise Applications

AI-assisted Development

Subject Matter Expert, Nokia Technology Center Philippines Inc., Quezon City, Metro Manila, Philippines

MARCH 2015 — JANUARY 2018

- Developed embedded systems and Digital Signal Processing (DSP) components using C++ in a test-driven Agile (Scrum) environment.
- Participated in the full product lifecycle: design, implementation, system component testing, and entity testing.
- Shared domain expertise and technical guidance with cross-functional engineering teams.
- Served as mandatory code reviewer, enforcing code quality and reducing regression risk.
- Provided customer-facing technical support and resolved complex escalations.
- Contributed to regression testing activities, improving platform stability.

Education

Bachelor of Science in Computer Science, University of the Philippines, Los Baños, Laguna, Philippines
